Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2003 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Anchorage

Inspection and Process of Tension of Cables of General Rafael Urdaneta Bridge. —Antonio Sarcos-Portillo, Alfredo Navarro-Cerpa, and Hildrun García-Legl; 8(4), 223-8 (2003).

Assessment

Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).

Predicting Truck Load Spectra under Weight Limit Changes and Its Application to Steel Bridge Fatigue Assessment. —Harry Cohen, Gongkang Fu, Wassem Dekelbab, and Fred Moses; 8(5), 312-22 (2003).

Risk-Based Expenditure Allocation for Infrastructure Improvement. —Bilal M. Ayyub and Clara Popescu; 8(6), 394-404 (2003).

Beams

Local Effects Induced by Longitudinal Forces in Composite Girders. —Luigino Dezi and Graziano Leoni; 8(4), 245-8 (2003).

Design and Construction of a Bridge in Very High Performance Fiber-Reinforced Concrete. —A. Meda and G. Rosati; 8(5), 281-7 (2003).

Bearing capacity

Thermal Effects on Skewed Steel Highway Bridges and Bearing Orientation. —Troy T. Tindal and Chai H. Yoo; 8(2), 57-65 (2003).

Experimental Investigations of Bailey Bridges. —W. S. King and L. Duan; 8(5), 334-9 (2003).

Box girders

Stability of Slender Webs of Prestressed Concrete Box-Girder Bridges. —Walter Dilger and Alaa Sherif; 8(3), 138-43 (2003).

Inspection and Process of Tension of Cables of General Rafael Urdaneta Bridge. —Antonio Sarcos-Portillo, Alfredo Navarro-Cerpa, and Hildrun García-Legl; 8(4), 223-8 (2003).

Live-Load Distribution Factors for Concrete Box-Girder Bridges. —Shin-Tai Song, Y. H. Chai, and Susan E. Hida; 8(5), 273-80 (2003).

Bridge abutments

Assessment of Shear Forces on Bridge Abutments: Simplified Method. —G. Benzoni, M. P. Limongelli, and M. J. N. Priestley; 8(1), 29-38 (2003).

Bridge construction

Design and Construction of a Bridge in Very High Performance Fiber-Reinforced Concrete. — A. Meda and G. Rosati; 8(5), 281-7 (2003).

Bridge decks

LRFD Orthotropic Plate Model for Live Load Moment in Filled Grid Decks. — Christopher Higgins; 8(1), 20-8 (2003).

Nonlinear Finite-Element Analysis for Highway Bridge Superstructures. — Kuan-Chen Fu and Feng Lu; 8(3), 173-9 (2003).

Full-Scale Fatigue Tests of Steel Orthotropic Decks for the Williamsburg Bridge. — Paul A. Tsakopoulos and John W. Fisher; 8(5), 323-33 (2003).

Identification of Environmental Categories for Markovian Deterioration Models of Bridge Decks. — G. Morcous, Z. Lounis, and M. S. Mirza; 8(6), 353-61 (2003).

Bridge design

Design for Shear in Curved Composite Multiple Steel Box Girder Bridges. — Khaled Sennah, John B. Kennedy, and Said Nour; 8(3), 144-52 (2003).

Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. —Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).

Tuned Mass Dampers for Dual-Mode Buffeting Control of Bridges. —C. C. Chang, M. Gu, and K. H. Tang; 8(4), 237-40 (2003).

Design and Construction of a Bridge in Very High Performance Fiber-Reinforced Concrete. —A. Meda and G. Rosati; 8(5), 281-7 (2003).

Bridge failure

Predicting Truck Load Spectra under Weight Limit Changes and Its Application to Steel Bridge Fatigue Assessment. —Harry Cohen, Gongkang Fu, Wassem Dekelbab, and Fred Moses; 8(5), 312-22 (2003).

Multiple Limit States and Expected Failure Costs for Deteriorating Reinforced Concrete Bridges. —Mark G. Stewart and Dimitri V. Val; 8(6), 405-15 (2003).

Bridge inspection

Fiber Optic Sensors for Bridge Monitoring. —Joan R. Casas and Paulo J. S. Cruz; 8(6), 362-73 (2003).

Updating Bridge Reliability Based on Bridge Management Systems Visual Inspection Results. —Allen C. Estes and Dan M. Frangopol; 8(6), 374-82 (2003).

Bridge piers

Unbonded Posttensioned Concrete Bridge Piers. I: Monotonic and Cyclic Analyses. —Wing-Pin Kwan and Sarah L. Billington; 8(2), 92-101 (2003).

Unbonded Posttensioned Concrete Bridge Piers. II: Seismic Analyses. —Wing-Pin Kwan and Sarah L. Billington; 8(2), 102-11 (2003).

Bridges

Proposed Design Method for Thermal Bridge Movements. — Charles W. Roeder; 8(1), 12-9 (2003).

Full-Scale Tests of Seismic Cable Restrainer Retrofits for Simply Supported Bridges. — Reginald DesRoches, Thomas Pfeifer , Roberto T. Leon, and Tam Lam; 8(4), 191-8 (2003).

Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. — David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Experimental Investigations of Bailey Bridges. — W. S. King and L. Duan; 8(5), 334-9 (2003).

Florida DOT Project-Level Bridge Management Models. — Paul D. Thompson, John O. Sobanjo, and Richard Kerr; 8(6), 345-52 (2003).

Rating and Reliability of Existing Bridges in a Network. — Ferhat Akgül and Dan M. Frangopol; 8(6), 383-93 (2003).

Bridges, arch

Construction Control of Reinforced Concrete Arch Bridges. — F. T. K. Au, J. J. Wang, and G. D. Liu; 8(1), 39-45 (2003).

Bridges, box girder

Design for Shear in Curved Composite Multiple Steel Box Girder Bridges. —Khaled Sennah, John B. Kennedy, and Said Nour; 8(3), 144-52 (2003).

Bridges, cable-stayed

Conceptual Design for the Sunniberg Bridge. —Chelsea Honigmann and David P. Billington; 8(3), 122-30 (2003).

Optimization of Cable Tensioning in Cable-Stayed Bridges. —D. Janjic, M. Pircher, and H. Pircher; 8(3), 131-7 (2003).

Inspection and Process of Tension of Cables of General Rafael Urdaneta Bridge. —Antonio Sarcos-Portillo, Alfredo Navarro-Cerpa, and Hildrun García-Legl; 8(4), 223-8 (2003).

Neural Networks for Decentralized Control of Cable-Stayed Bridge. —B. Xu, Z. S. Wu, and K. Yokoyama; 8(4), 229-36 (2003).

Probabilistic Strength Estimates and Reliability of Damaged Parallel Wire Cables. —Sante Camo; 8(5), 297-311 (2003).

Bridges, cantilever

Niagara Cantilever. —Francis E. Griggs, Jr.; 8(1), 2-11 (2003).

Bridges, composite

Deflection Requirements for Bridges Constructed with Advanced Composite Materials. —J. R. Demitz, D. R. Mertz, and J. W. Gillespie; 8(2), 73-83 (2003).

Design for Shear in Curved Composite Multiple Steel Box Girder Bridges. —Khaled Sennah, John B. Kennedy, and Said Nour; 8(3), 144-52 (2003).

Bridges, concrete
Unbonded Posttensioned Concrete Bridge Piers. I: Monotonic and Cyclic Analyses. — Wing-Pin Kwan and Sarah L. Billington; 8(2), 92-101 (2003).
Unbonded Posttensioned Concrete Bridge Piers. II: Seismic Analyses. — Wing-Pin Kwan and Sarah L. Billington; 8(2), 102-11 (2003).
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).
Live-Load Distribution Factors for Concrete Box-Girder Bridges. — Shin-Tai Song, Y. H. Chai, and Susan E. Hida; 8(5), 273-80 (2003).
Multiple Limit States and Expected Failure Costs for Deteriorating Reinforced Concrete Bridges. — Mark G. Stewart and Dimitri V. Val; 8(6), 405-15 (2003).

Bridges, girder
Stability of Slender Webs of Prestressed Concrete Box-Girder Bridges. — Walter Dilger and Alaa Sherif; 8(3), 138-43 (2003).
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).
Natural Frequency of Railway Girder Bridges under Vehicle Loads. —Jianzhong Li, Mubiao Su, and Lichu Fan; 8(4), 199-203 (2003).
Finite-Element Analysis of Steel Bridge Distortion-Induced Fatigue. —W. M. Kim Roddis and Yuan Zhao; 8(5), 259-66 (2003).
Live-Load Distribution Factors for Concrete Box-Girder Bridges. —Shin-Tai Song, Y. H. Chai, and Susan E. Hida; 8(5), 273-80 (2003).

Bridges, highway
Thermal Effects on Skewed Steel Highway Bridges and Bearing Orientation. —Troy T. Tindal and Chai H. Yoo; 8(2), 57-65 (2003).
Model Validation for Bridge-Road-Vehicle Dynamic Interaction System. —Hani H. Nassif, Ming Liu, and Oguz Ertekin; 8(2), 112-20 (2003).
Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).
Nonlinear Finite-Element Analysis for Highway Bridge Superstructures. —Kuan-Chen Fu and Feng Lu; 8(3), 173-9 (2003).
Updating Bridge Reliability Based on Bridge Management Systems Visual Inspection Results. —Allen C. Estes and Dan M. Frangopol; 8(6), 374-82 (2003).

Bridges, railroad
Niagara Cantilever. —Francis E. Griggs, Jr.; 8(1), 2-11 (2003).
Natural Frequency of Railway Girder Bridges under Vehicle Loads. —Jianzhong Li, Mubiao Su, and Lichu Fan; 8(4), 199-203 (2003).

Bridges, skew
Thermal Effects on Skewed Steel Highway Bridges and Bearing Orientation. —Troy T. Tindal and Chai H. Yoo; 8(2), 57-65 (2003).
Load Distribution Factors in Simply Supported Skew Bridges. —Ali R. Khaloo and H. Mirzabozorg; 8(4), 241-4 (2003).

Bridges, spans
Tuned Mass Dampers for Dual-Mode Buffeting Control of Bridges. — C. C. Chang, M. Gu, and K. H. Tang; 8(4), 237-40 (2003).

Bridges, steel
Thermal Effects on Skewed Steel Highway Bridges and Bearing Orientation. — Troy T. Tindal and Chai H. Yoo; 8(2), 57-65 (2003).
Determining Appropriate Fatigue Inspection Intervals for Steel Bridge Members. — Steven C. Lovejoy; 8(2), 66-72 (2003).
Measurement and Analysis of Distortion-Induced Fatigue in Multigirder Steel Bridges. — D. Jajich and A. E. Schultz; 8(2), 84-91 (2003).
Design for Shear in Curved Composite Multiple Steel Box Girder Bridges. — Khaled Sennah, John B. Kennedy, and Said Nour; 8(3), 144-52 (2003).
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).
Finite-Element Analysis of Steel Bridge Distortion-Induced Fatigue. —W. M. Kim Roddis and Yuan Zhao; 8(5), 259-66 (2003).
Predicting Truck Load Spectra under Weight Limit Changes and Its Application to Steel Bridge Fatigue Assessment. —Harry Cohen, Gongkang Fu, Wassem Dekelbab, and Fred Moses; 8(5), 312-22 (2003).

Bridges, suspension
Niagara Cantilever. —Francis E. Griggs, Jr.; 8(1), 2-11 (2003).
Dynamic Response of Suspension Bridge to High Wind and Running Train. —Y. L. Xu, H. Xia, and Q. S. Yan; 8(1), 46-55 (2003).
Increasing the Load Capacity of Suspension Bridges. — Peter G. Buckland; 8(5), 288-96 (2003).

Bridges, truss
Stability of Slender Webs of Prestressed Concrete Box-Girder Bridges. —Walter Dilger and Alaa Sherif; 8(3), 138-43 (2003).

Bridges, viaduct
Assessment of Performance of Seismic Isolation System of Bolu Viaduct. —Panayiotis C. Roussis, Michael C. Constantinou, Mustafa Erdik, Eser Durukal, and Murat Dicleli; 8(4), 182-90 (2003).

Buffeting
Tuned Mass Dampers for Dual-Mode Buffeting Control of Bridges. —C. C. Chang, M. Gu, and K. H. Tang; 8(4), 237-40 (2003).

Cables
Full-Scale Tests of Seismic Cable Restrainer Retrofits for Simply Supported Bridges. —Reginald DesRoches, Thomas Pfeifer , Roberto T. Leon, and Tam Lam; 8(4), 191-8 (2003).
Probabilistic Strength Estimates and Reliability of Damaged Parallel Wire Cables. —Sante Camo; 8(5), 297-311 (2003).

California
Live-Load Distribution Factors for Concrete Box-Girder Bridges. —Shin-Tai Song, Y. H. Chai, and Susan E. Hida; 8(5), 273-80 (2003).

Colorado
Updating Bridge Reliability Based on Bridge Management Systems Visual Inspection Results. —Allen C. Estes and Dan M. Frangopol; 8(6), 374-82 (2003).

Composite materials
Deflection Requirements for Bridges Constructed with Advanced Composite Materials. — J. R. Demitz, D. R. Mertz, and J. W. Gillespie; 8(2), 73-83 (2003).
Local Effects Induced by Longitudinal Forces in Composite Girders. — Luigino Dezi and Graziano Leoni; 8(4), 245-8 (2003).

Computation
Risk-Based Expenditure Allocation for Infrastructure Improvement. — Bilal M. Ayyub and Clara Popescu; 8(6), 394-404 (2003).

Conceptual design
Conceptual Design for the Sunniberg Bridge. — Chelsea Honigmann and David P. Billington; 8(3), 122-30 (2003).

Concrete structures
Conceptual Design for the Sunniberg Bridge. — Chelsea Honigmann and David P. Billington; 8(3), 122-30 (2003).

Concrete, precast
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).

Concrete, prestressed
Stability of Slender Webs of Prestressed Concrete Box-Girder Bridges. —Walter Dilger and Alaa Sherif; 8(3), 138-43 (2003).
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).

Concrete, reinforced
Construction Control of Reinforced Concrete Arch Bridges. —F. T. K. Au, J. J. Wang, and G. D. Liu; 8(1), 39-45 (2003).
Design and Construction of a Bridge in Very High Performance Fiber-Reinforced Concrete. —A. Meda and G. Rosati; 8(5), 281-7 (2003).

Connections
Local Effects Induced by Longitudinal Forces in Composite Girders. —Luigino Dezi and Graziano Leoni; 8(4), 245-8 (2003).
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).

Construction management
Construction Control of Reinforced Concrete Arch Bridges. —F. T. K. Au, J. J. Wang, and G. D. Liu; 8(1), 39-45 (2003).

Continuous structures
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).

Contraction
Proposed Design Method for Thermal Bridge Movements. — Charles W. Roeder; 8(1), 12-9 (2003).

Corrosion
Multiple Limit States and Expected Failure Costs for Deteriorating Reinforced Concrete Bridges. —Mark G. Stewart and Dimitri V. Val; 8(6), 405-15 (2003).

Cost allocation
Risk-Based Expenditure Allocation for Infrastructure Improvement. — Bilal M. Ayyub and Clara Popescu; 8(6), 394-404 (2003).

Costs
Multiple Limit States and Expected Failure Costs for Deteriorating Reinforced Concrete Bridges. — Mark G. Stewart and Dimitri V. Val; 8(6), 405-15 (2003).

Cracking
Finite-Element Analysis of Steel Bridge Distortion-Induced Fatigue. — W. M. Kim Roddis and Yuan Zhao; 8(5), 259-66 (2003).
Full-Scale Fatigue Tests of Steel Orthotropic Decks for the Williamsburg Bridge. — Paul A. Tsakopoulos and John W. Fisher; 8(5), 323-33 (2003).

Cyclic loads
Unbonded Posttensioned Concrete Bridge Piers. I: Monotonic and Cyclic Analyses. — Wing-Pin Kwan and Sarah L. Billington; 8(2), 92-101 (2003).

Damping
Tuned Mass Dampers for Dual-Mode Buffeting Control of Bridges. —C. C. Chang, M. Gu, and K. H. Tang; 8(4), 237-40 (2003).

Deflection
Deflection Requirements for Bridges Constructed with Advanced Composite Materials. —J. R. Demitz, D. R. Mertz, and J. W. Gillespie; 8(2), 73-83 (2003).
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).
Nonlinear Finite-Element Analysis for Highway Bridge Superstructures. —Kuan-Chen Fu and Feng Lu; 8(3), 173-9 (2003).
Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. —David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Deterioration
Identification of Environmental Categories for Markovian Deterioration Models of Bridge Decks. — G. Morcous, Z. Lounis, and M. S. Mirza; 8(6), 353-61 (2003).
Rating and Reliability of Existing Bridges in a Network. — Ferhat Akgül and Dan M. Frangopol; 8(6), 383-93 (2003).
Multiple Limit States and Expected Failure Costs for Deteriorating Reinforced Concrete Bridges. —Mark G. Stewart and Dimitri V. Val; 8(6), 405-15 (2003).

Diaphragms
Load Distribution Factors in Simply Supported Skew Bridges. —Ali R. Khaloo and H. Mirzabozorg; 8(4), 241-4 (2003).

Distortion
Measurement and Analysis of Distortion-Induced Fatigue in Multigirder Steel Bridges. —D. Jajich and A. E. Schultz; 8(2), 84-91 (2003).

Distribution functions
Load Distribution Factors in Simply Supported Skew Bridges. —Ali R. Khaloo and H. Mirzabozorg; 8(4), 241-4 (2003).

Dynamic loads
Model Validation for Bridge-Road-Vehicle Dynamic Interaction System. —Hani H. Nassif, Ming Liu, and Oguz Ertekin; 8(2), 112-20 (2003).
Natural Frequency of Railway Girder Bridges under Vehicle Loads. — Jianzhong Li, Mubiao Su, and Lichu Fan; 8(4), 199-203 (2003).

Dynamic responses
Dynamic Response of Suspension Bridge to High Wind and Running Train. — Y. L. Xu, H. Xia, and Q. S. Yan; 8(1), 46-55 (2003).

Dynamic tests
Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).

Earthquake damage
Assessment of Performance of Seismic Isolation System of Bolu Viaduct. — Panayiotis C. Roussis, Michael C. Constantinou, Mustafa Erdik, Eser Durukal, and Murat Dicleli; 8(4), 182-90 (2003).

Earthquake engineering
Neural Networks for Decentralized Control of Cable-Stayed Bridge. — B. Xu, Z. S. Wu, and K. Yokoyama; 8(4), 229-36 (2003).

Elastic properties
LRFD Orthotropic Plate Model for Live Load Moment in Filled Grid Decks. —Christopher Higgins; 8(1), 20-8 (2003).

Environment
Identification of Environmental Categories for Markovian Deterioration Models of Bridge Decks. — G. Morcous, Z. Lounis, and M. S. Mirza; 8(6), 353-61 (2003).

Esthetics
Conceptual Design for the Sunniberg Bridge. —Chelsea Honigmann and David P. Billington; 8(3), 122-30 (2003).

Expansion
Proposed Design Method for Thermal Bridge Movements. — Charles W. Roeder; 8(1), 12-9 (2003).

Experimental data
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. —Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).

Fatigue
Determining Appropriate Fatigue Inspection Intervals for Steel Bridge Members. —Steven C. Lovejoy; 8(2), 66-72 (2003).
Measurement and Analysis of Distortion-Induced Fatigue in Multigirder Steel Bridges. —D. Jajich and A. E. Schultz; 8(2), 84-91 (2003).
Finite-Element Analysis of Steel Bridge Distortion-Induced Fatigue. —W. M. Kim Roddis and Yuan Zhao; 8(5), 259-66 (2003).

Fatigue tests
Full-Scale Fatigue Tests of Steel Orthotropic Decks for the Williamsburg Bridge. —Paul A. Tsakopoulos and John W. Fisher; 8(5), 323-33 (2003).

Fiber optics
Fiber Optic Sensors for Bridge Monitoring. —Joan R. Casas and Paulo J. S. Cruz; 8(6), 362-73 (2003).

Fiber reinforced materials
Design and Construction of a Bridge in Very High Performance Fiber-Reinforced Concrete. —A. Meda and G. Rosati; 8(5), 281-7 (2003).

Finite element method
LRFD Orthotropic Plate Model for Live Load Moment in Filled Grid Decks. —Christopher Higgins; 8(1), 20-8 (2003).
Unbonded Posttensioned Concrete Bridge Piers. I: Monotonic and Cyclic Analyses. — Wing-Pin Kwan and Sarah L. Billington; 8(2), 92-101 (2003).
Design for Shear in Curved Composite Multiple Steel Box Girder Bridges. — Khaled Sennah, John B. Kennedy, and Said Nour; 8(3), 144-52 (2003).
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).
Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).
Nonlinear Finite-Element Analysis for Highway Bridge Superstructures. — Kuan-Chen Fu and Feng Lu; 8(3), 173-9 (2003).
Finite-Element Analysis of Steel Bridge Distortion-Induced Fatigue. — W. M. Kim Roddis and Yuan Zhao; 8(5), 259-66 (2003).

Finite elements
Model Validation for Bridge-Road-Vehicle Dynamic Interaction System. —Hani H. Nassif, Ming Liu, and Oguz Ertekin; 8(2), 112-20 (2003).

Florida
Florida DOT Project-Level Bridge Management Models. — Paul D. Thompson, John O. Sobanjo, and Richard Kerr; 8(6), 345-52 (2003).

Full-scale tests
Full-Scale Tests of Seismic Cable Restrainer Retrofits for Simply Supported Bridges. —Reginald DesRoches, Thomas Pfeifer , Roberto T. Leon, and Tam Lam; 8(4), 191-8 (2003).
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. —Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).

Girders
Model Validation for Bridge-Road-Vehicle Dynamic Interaction System. —Hani H. Nassif, Ming Liu, and Oguz Ertekin; 8(2), 112-20 (2003).
Load Distribution Factors in Simply Supported Skew Bridges. —Ali R. Khaloo and H. Mirzabozorg; 8(4), 241-4 (2003).
Local Effects Induced by Longitudinal Forces in Composite Girders. —Luigino Dezi and Graziano Leoni; 8(4), 245-8 (2003).

History
Niagara Cantilever. —Francis E. Griggs, Jr.; 8(1), 2-11 (2003).
Experimental Investigations of Bailey Bridges. —W. S. King and L. Duan; 8(5), 334-9 (2003).

Imaging techniques
Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. —David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Information systems
Florida DOT Project-Level Bridge Management Models. — Paul D. Thompson, John O. Sobanjo, and Richard Kerr; 8(6), 345-52 (2003).

Infrastructure
Risk-Based Expenditure Allocation for Infrastructure Improvement. —Bilal M. Ayyub and Clara Popescu; 8(6), 394-404 (2003).

Interfaces
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. — Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).

Life cycles
Risk-Based Expenditure Allocation for Infrastructure Improvement. — Bilal M. Ayyub and Clara Popescu; 8(6), 394-404 (2003).
Multiple Limit States and Expected Failure Costs for Deteriorating Reinforced Concrete Bridges. — Mark G. Stewart and Dimitri V. Val; 8(6), 405-15 (2003).

Limit states
Updating Bridge Reliability Based on Bridge Management Systems Visual Inspection Results. — Allen C. Estes and Dan M. Frangopol; 8(6), 374-82 (2003).
Multiple Limit States and Expected Failure Costs for Deteriorating Reinforced Concrete Bridges. — Mark G. Stewart and Dimitri V. Val; 8(6), 405-15 (2003).

Live loads
LRFD Orthotropic Plate Model for Live Load Moment in Filled Grid Decks. —Christopher Higgins; 8(1), 20-8 (2003).
Live-Load Distribution Factors for Concrete Box-Girder Bridges. —Shin-Tai Song, Y. H. Chai, and Susan E. Hida; 8(5), 273-80 (2003).

Load capacity
Increasing the Load Capacity of Suspension Bridges. — Peter G. Buckland; 8(5), 288-96 (2003).

Load distribution
Load Distribution Factors in Simply Supported Skew Bridges. —Ali R. Khaloo and H. Mirzabozorg; 8(4), 241-4 (2003).
Live-Load Distribution Factors for Concrete Box-Girder Bridges. —Shin-Tai Song, Y. H. Chai, and Susan E. Hida; 8(5), 273-80 (2003).

Load tests
Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. —David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Management systems
Updating Bridge Reliability Based on Bridge Management Systems Visual Inspection Results. —Allen C. Estes and Dan M. Frangopol; 8(6), 374-82 (2003).

Markov chains
Identification of Environmental Categories for Markovian Deterioration Models of Bridge Decks. — G. Morcous, Z. Lounis, and M. S. Mirza; 8(6), 353-61 (2003).

Measurement
Measurement and Analysis of Distortion-Induced Fatigue in Multigirder Steel Bridges. —D. Jajich and A. E. Schultz; 8(2), 84-91 (2003).
Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. —David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Models
Florida DOT Project-Level Bridge Management Models. — Paul D. Thompson, John O. Sobanjo, and Richard Kerr; 8(6), 345-52 (2003).

Monitoring
Fiber Optic Sensors for Bridge Monitoring. — Joan R. Casas and Paulo J. S. Cruz; 8(6), 362-73 (2003).

Natural frequency
Natural Frequency of Railway Girder Bridges under Vehicle Loads. — Jianzhong Li, Mubiao Su, and Lichu Fan; 8(4), 199-203 (2003).

Network analysis
Rating and Reliability of Existing Bridges in a Network. — Ferhat Akgül and Dan M. Frangopol; 8(6), 383-93 (2003).

Neural networks
Neural Networks for Decentralized Control of Cable-Stayed Bridge. — B. Xu, Z. S. Wu, and K. Yokoyama; 8(4), 229-36 (2003).

New York
Full-Scale Fatigue Tests of Steel Orthotropic Decks for the Williamsburg Bridge. — Paul A. Tsakopoulos and John W. Fisher; 8(5), 323-33 (2003).

New York City
Full-Scale Fatigue Tests of Steel Orthotropic Decks for the Williamsburg Bridge. — Paul A. Tsakopoulos and John W. Fisher; 8(5), 323-33 (2003).

Niagara River
Niagara Cantilever. —Francis E. Griggs, Jr.; 8(1), 2-11 (2003).

Numerical models
Unbonded Posttensioned Concrete Bridge Piers. II: Seismic Analyses. —Wing-Pin Kwan and Sarah L. Billington; 8(2), 102-11 (2003).
Neural Networks for Decentralized Control of Cable-Stayed Bridge. —B. Xu, Z. S. Wu, and K. Yokoyama; 8(4), 229-36 (2003).

Optimization
Optimization of Cable Tensioning in Cable-Stayed Bridges. —D. Janjic, M. Pircher, and H. Pircher; 8(3), 131-7 (2003).
Tuned Mass Dampers for Dual-Mode Buffeting Control of Bridges. —C. C. Chang, M. Gu, and K. H. Tang; 8(4), 237-40 (2003).
Identification of Environmental Categories for Markovian Deterioration Models of Bridge Decks. — G. Morcous, Z. Lounis, and M. S. Mirza; 8(6), 353-61 (2003).

Oregon
Determining Appropriate Fatigue Inspection Intervals for Steel Bridge Members. —Steven C. Lovejoy; 8(2), 66-72 (2003).

Orthotropism
LRFD Orthotropic Plate Model for Live Load Moment in Filled Grid Decks. —Christopher Higgins; 8(1), 20-8 (2003).
Full-Scale Fatigue Tests of Steel Orthotropic Decks for the Williamsburg Bridge. —Paul A. Tsakopoulos and John W. Fisher; 8(5), 323-33 (2003).

Photogrammetry
Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. —David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Piers
Inspection and Process of Tension of Cables of General Rafael Urdaneta Bridge. —Antonio Sarcos-Portillo, Alfredo Navarro-Cerpa, and Hildrun García-Legl; 8(4), 223-8 (2003).

Plates
Inspection and Process of Tension of Cables of General Rafael Urdaneta Bridge. — Antonio Sarcos-Portillo, Alfredo Navarro-Cerpa, and Hildrun García-Legl; 8(4), 223-8 (2003).

Post tensioning
Unbonded Posttensioned Concrete Bridge Piers. I: Monotonic and Cyclic Analyses. — Wing-Pin Kwan and Sarah L. Billington; 8(2), 92-101 (2003).
Unbonded Posttensioned Concrete Bridge Piers. II: Seismic Analyses. — Wing-Pin Kwan and Sarah L. Billington; 8(2), 102-11 (2003).

Pretensioning
Inspection and Process of Tension of Cables of General Rafael Urdaneta Bridge. — Antonio Sarcos-Portillo, Alfredo Navarro-Cerpa, and Hildrun García-Legl; 8(4), 223-8 (2003).

Probabilistic methods
Probabilistic Strength Estimates and Reliability of Damaged Parallel Wire Cables. — Sante Camo; 8(5), 297-311 (2003).

Railroad trains
Dynamic Response of Suspension Bridge to High Wind and Running Train. — Y. L. Xu, H. Xia, and Q. S. Yan; 8(1), 46-55 (2003).

Rehabilitation
Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).
Finite-Element Analysis of Steel Bridge Distortion-Induced Fatigue. —W. M. Kim Roddis and Yuan Zhao; 8(5), 259-66 (2003).
Increasing the Load Capacity of Suspension Bridges. — Peter G. Buckland; 8(5), 288-96 (2003).
Updating Bridge Reliability Based on Bridge Management Systems Visual Inspection Results. —Allen C. Estes and Dan M. Frangopol; 8(6), 374-82 (2003).

Reliability analysis
Probabilistic Strength Estimates and Reliability of Damaged Parallel Wire Cables. —Sante Camo; 8(5), 297-311 (2003).
Rating and Reliability of Existing Bridges in a Network. — Ferhat Akgül and Dan M. Frangopol; 8(6), 383-93 (2003).

Residual stress
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).

Retrofitting
Full-Scale Tests of Seismic Cable Restrainer Retrofits for Simply Supported Bridges. —Reginald DesRoches, Thomas Pfeifer , Roberto T. Leon, and Tam Lam; 8(4), 191-8 (2003).

Risk analysis
Risk-Based Expenditure Allocation for Infrastructure Improvement. —Bilal M. Ayyub and Clara Popescu; 8(6), 394-404 (2003).

Seismic analysis
Unbonded Posttensioned Concrete Bridge Piers. II: Seismic Analyses. —Wing-Pin Kwan and Sarah L. Billington; 8(2), 102-11 (2003).

Seismic isolation
Assessment of Performance of Seismic Isolation System of Bolu Viaduct. — Panayiotis C. Roussis, Michael C. Constantinou, Mustafa Erdik, Eser Durukal, and Murat Dicleli; 8(4), 182-90 (2003).
Sensors
Fiber Optic Sensors for Bridge Monitoring. — Joan R. Casas and Paulo J. S. Cruz; 8(6), 362-73 (2003).
Shear distribution
Design for Shear in Curved Composite Multiple Steel Box Girder Bridges. — Khaled Sennah, John B. Kennedy, and Said Nour; 8(3), 144-52 (2003).
Shear forces
Assessment of Shear Forces on Bridge Abutments: Simplified Method. — G. Benzoni, M. P. Limongelli, and M. J. N. Priestley; 8(1), 29-38 (2003).
Singapore
Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).
Slabs
Local Effects Induced by Longitudinal Forces in Composite Girders. — Luigino Dezi and Graziano Leoni; 8(4), 245-8 (2003).
Stability
Stability of Slender Webs of Prestressed Concrete Box-Girder Bridges. — Walter Dilger and Alaa Sherif; 8(3), 138-43 (2003).
State government
Florida DOT Project-Level Bridge Management Models. — Paul D. Thompson, John O. Sobanjo, and Richard Kerr; 8(6), 345-52 (2003).
Steel frames
Experimental Investigations of Bailey Bridges. — W. S. King and L. Duan; 8(5), 334-9 (2003).
Strain gauges
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. — Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).
Strain measurement
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. — Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).
Stress
Model Validation for Bridge-Road-Vehicle Dynamic Interaction System. — Hani H. Nassif, Ming Liu, and Oguz Ertekin; 8(2), 112-20 (2003).
Stress analysis
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. — Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).
Structural analysis
Experimental Investigations of Bailey Bridges. — W. S. King and L. Duan; 8(5), 334-9 (2003).
Structural control
Neural Networks for Decentralized Control of Cable-Stayed Bridge. — B. Xu, Z. S. Wu, and K. Yokoyama; 8(4), 229-36 (2003).
Structural members
Determining Appropriate Fatigue Inspection Intervals for Steel Bridge Members. — Steven C. Lovejoy; 8(2), 66-72 (2003).
Structural reliability
Updating Bridge Reliability Based on Bridge Management Systems Visual Inspection Results. — Allen C. Estes and Dan M. Frangopol; 8(6), 374-82 (2003).
Structural safety
Increasing the Load Capacity of Suspension Bridges. — Peter G. Buckland; 8(5), 288-96 (2003).
Superstructures
Nonlinear Finite-Element Analysis for Highway Bridge Superstructures. — Kuan-Chen Fu and Feng Lu; 8(3), 173-9 (2003).
Switzerland
Conceptual Design for the Sunniberg Bridge. — Chelsea Honigmann and David P. Billington; 8(3), 122-30 (2003).
Temperature
Proposed Design Method for Thermal Bridge Movements. — Charles W. Roeder; 8(1), 12-9 (2003).
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).
Tension
Optimization of Cable Tensioning in Cable-Stayed Bridges. — D. Janjic, M. Pircher, and H. Pircher; 8(3), 131-7 (2003).
Thermal factors
Proposed Design Method for Thermal Bridge Movements. — Charles W. Roeder; 8(1), 12-9 (2003).
Thermal Effects on Skewed Steel Highway Bridges and Bearing Orientation. — Troy T. Tindal and Chai H. Yoo; 8(2), 57-65 (2003).
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).
Thermal stresses
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. — Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).
Trucks
Predicting Truck Load Spectra under Weight Limit Changes and Its Application to Steel Bridge Fatigue Assessment. — Harry Cohen, Gongkang Fu, Wassem Dekelbab, and Fred Moses; 8(5), 312-22 (2003).
Turkey
Assessment of Performance of Seismic Isolation System of Bolu Viaduct. — Panayiotis C. Roussis, Michael C. Constantinou, Mustafa Erdik, Eser Durukal, and Murat Dicleli; 8(4), 182-90 (2003).
Uncertainty analysis
Rating and Reliability of Existing Bridges in a Network. — Ferhat Akgül and Dan M. Frangopol; 8(6), 383-93 (2003).
Vehicles
Model Validation for Bridge-Road-Vehicle Dynamic Interaction System. — Hani H. Nassif, Ming Liu, and Oguz Ertekin; 8(2), 112-20 (2003).
Vibration
Neural Networks for Decentralized Control of Cable-Stayed Bridge. — B. Xu, Z. S. Wu, and K. Yokoyama; 8(4), 229-36 (2003).
Webs
Stability of Slender Webs of Prestressed Concrete Box-Girder Bridges. — Walter Dilger and Alaa Sherif; 8(3), 138-43 (2003).
Weight
Predicting Truck Load Spectra under Weight Limit Changes and Its Application to Steel Bridge Fatigue Assessment. — Harry Cohen, Gongkang Fu, Wassem Dekelbab, and Fred Moses; 8(5), 312-22 (2003).
Wind loads
Dynamic Response of Suspension Bridge to High Wind and Running Train. — Y. L. Xu, H. Xia, and Q. S. Yan; 8(1), 46-55 (2003).

Author Index

Akgül, Ferhat
Rating and Reliability of Existing Bridges in a Network. — Ferhat Akgül and Dan M. Frangopol; 8(6), 383-93 (2003).

Attoh-Okine, Nii O.
Editorial. —Nii O. Attoh-Okine; 8(6), 343-4 (2003).

Au, F. T. K.
Construction Control of Reinforced Concrete Arch Bridges. —F. T. K. Au, J. J. Wang, and G. D. Liu; 8(1), 39-45 (2003).

Ayyub, Bilal M.
Risk-Based Expenditure Allocation for Infrastructure Improvement. —Bilal M. Ayyub and Clara Popescu; 8(6), 394-404 (2003).

Benzoni, G.
Assessment of Shear Forces on Bridge Abutments: Simplified Method. —G. Benzoni, M. P. Limongelli, and M. J. N. Priestley; 8(1), 29-38 (2003).

Besterfield, Glen
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. —Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).

Billington, David P.
Conceptual Design for the Sunniberg Bridge. —Chelsea Honigmann and David P. Billington; 8(3), 122-30 (2003).

Billington, Sarah L.
Unbonded Posttensioned Concrete Bridge Piers. I: Monotonic and Cyclic Analyses. —Wing-Pin Kwan and Sarah L. Billington; 8(2), 92-101 (2003).
Unbonded Posttensioned Concrete Bridge Piers. II: Seismic Analyses. —Wing-Pin Kwan and Sarah L. Billington; 8(2), 102-11 (2003).

Breen, John E.
Closure to "Measurements of Thermal Gradients and their Effects on Segmental Concrete Bridge" by Carin L. Roberts- Wollman, John E. Breen, and Jason Cawrse. —Carin L. Roberts-Wollman, John E. Breen, and Jason Cawrse; 8(5), 341-2 (2003).

Brownjohn, James Mark William
Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).

Buckland, Peter G.
Increasing the Load Capacity of Suspension Bridges. — Peter G. Buckland; 8(5), 288-96 (2003).

Camo, Sante
Probabilistic Strength Estimates and Reliability of Damaged Parallel Wire Cables. —Sante Camo; 8(5), 297-311 (2003).

Casas, Joan R.
Fiber Optic Sensors for Bridge Monitoring. — Joan R. Casas and Paulo J. S. Cruz; 8(6), 362-73 (2003).

Castrodale, Reid
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).

Cawrse, Jason
Closure to "Measurements of Thermal Gradients and their Effects on Segmental Concrete Bridge" by Carin L. Roberts- Wollman, John E. Breen, and Jason Cawrse. — Carin L. Roberts-Wollman, John E. Breen, and Jason Cawrse; 8(5), 341-2 (2003).

Chai, Y. H.
Live-Load Distribution Factors for Concrete Box-Girder Bridges. — Shin-Tai Song, Y. H. Chai, and Susan E. Hida; 8(5), 273-80 (2003).

Chang, C. C.
Tuned Mass Dampers for Dual-Mode Buffeting Control of Bridges. —C. C. Chang, M. Gu, and K. H. Tang; 8(4), 237-40 (2003).

Cohen, Harry
Predicting Truck Load Spectra under Weight Limit Changes and Its Application to Steel Bridge Fatigue Assessment. —Harry Cohen, Gongkang Fu, Wassem Dekelbab, and Fred Moses; 8(5), 312-22 (2003).

Constantinou, Michael C.
Assessment of Performance of Seismic Isolation System of Bolu Viaduct. —Panayiotis C. Roussis, Michael C. Constantinou, Mustafa Erdik, Eser Durukal, and Murat Dicleli; 8(4), 182-90 (2003).

Cruz, Paulo J. S.
Fiber Optic Sensors for Bridge Monitoring. —Joan R. Casas and Paulo J. S. Cruz; 8(6), 362-73 (2003).

Dekelbab, Wassem
Predicting Truck Load Spectra under Weight Limit Changes and Its Application to Steel Bridge Fatigue Assessment. —Harry Cohen, Gongkang Fu, Wassem Dekelbab, and Fred Moses; 8(5), 312-22 (2003).

Demitz, J. R.
Deflection Requirements for Bridges Constructed with Advanced Composite Materials. —J. R. Demitz, D. R. Mertz, and J. W. Gillespie; 8(2), 73-83 (2003).

DesRoches, Reginald
Full-Scale Tests of Seismic Cable Restrainer Retrofits for Simply Supported Bridges. —Reginald DesRoches, Thomas Pfeifer , Roberto T. Leon, and Tam Lam; 8(4), 191-8 (2003).

Dezi, Luigino
Local Effects Induced by Longitudinal Forces in Composite Girders. — Luigino Dezi and Graziano Leoni; 8(4), 245-8 (2003).

Dicleli, Murat
Assessment of Performance of Seismic Isolation System of Bolu Viaduct. — Panayiotis C. Roussis, Michael C. Constantinou, Mustafa Erdik, Eser Durukal, and Murat Dicleli; 8(4), 182-90 (2003).

Dilger, Walter
Stability of Slender Webs of Prestressed Concrete Box-Girder Bridges. — Walter Dilger and Alaa Sherif; 8(3), 138-43 (2003).

Duan, L.
Experimental Investigations of Bailey Bridges. — W. S. King and L. Duan; 8(5), 334-9 (2003).

Durukal, Eser
Assessment of Performance of Seismic Isolation System of Bolu Viaduct. — Panayiotis C. Roussis, Michael C. Constantinou, Mustafa Erdik, Eser Durukal, and Murat Dicleli; 8(4), 182-90 (2003).

Eason, Thomas
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. —Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).

Emerson, Mary
Discussion of "Measurements of Thermal Gradients and their Effects on Segmental Concrete Bridge" by Carin L. Roberts-Wollman, John E. Breen, and Jason Cawrse. —Brian W. Smith and Mary Emerson; 8(5), 340-1 (2003).

Erdik, Mustafa
Assessment of Performance of Seismic Isolation System of Bolu Viaduct. —Panayiotis C. Roussis, Michael C. Constantinou, Mustafa Erdik, Eser Durukal, and Murat Dicleli; 8(4), 182-90 (2003).

Ertekin, Oguz
Model Validation for Bridge-Road-Vehicle Dynamic Interaction System. —Hani H. Nassif, Ming Liu, and Oguz Ertekin; 8(2), 112-20 (2003).

Estes, Allen C.
Updating Bridge Reliability Based on Bridge Management Systems Visual Inspection Results. —Allen C. Estes and Dan M. Frangopol; 8(6), 374-82 (2003).

Fan, Lichu
Natural Frequency of Railway Girder Bridges under Vehicle Loads. —Jianzhong Li, Mubiao Su, and Lichu Fan; 8(4), 199-203 (2003).

Fisher, John W.
Full-Scale Fatigue Tests of Steel Orthotropic Decks for the Williamsburg Bridge. —Paul A. Tsakopoulos and John W. Fisher; 8(5), 323-33 (2003).

Frangopol, Dan M.
Updating Bridge Reliability Based on Bridge Management Systems Visual Inspection Results. — Allen C. Estes and Dan M. Frangopol; 8(6), 374-82 (2003).
Rating and Reliability of Existing Bridges in a Network. — Ferhat Akgül and Dan M. Frangopol; 8(6), 383-93 (2003).

Fu, Gongkang
Predicting Truck Load Spectra under Weight Limit Changes and Its Application to Steel Bridge Fatigue Assessment. — Harry Cohen, Gongkang Fu, Wassem Dekelbab, and Fred Moses; 8(5), 312-22 (2003).

Fu, Kuan-Chen
Nonlinear Finite-Element Analysis for Highway Bridge Superstructures. — Kuan-Chen Fu and Feng Lu; 8(3), 173-9 (2003).

García-Legl, Hildrun
Inspection and Process of Tension of Cables of General Rafael Urdaneta Bridge. — Antonio Sarcos-Portillo, Alfredo Navarro-Cerpa, and Hildrun García-Legl; 8(4), 223-8 (2003).

Gergess, Antoine N.
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).

Gillespie, J. W.
Deflection Requirements for Bridges Constructed with Advanced Composite Materials. —J. R. Demitz, D. R. Mertz, and J. W. Gillespie; 8(2), 73-83 (2003).

Griggs, Francis E., Jr.
Niagara Cantilever. —Francis E. Griggs, Jr.; 8(1), 2-11 (2003).

Gu, M.
Tuned Mass Dampers for Dual-Mode Buffeting Control of Bridges. —C. C. Chang, M. Gu, and K. H. Tang; 8(4), 237-40 (2003).

Hastak, Makarand
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).

Hida, Susan E.
Live-Load Distribution Factors for Concrete Box-Girder Bridges. —Shin-Tai Song, Y. H. Chai, and Susan E. Hida; 8(5), 273-80 (2003).

Higgins, Christopher
LRFD Orthotropic Plate Model for Live Load Moment in Filled Grid Decks. —Christopher Higgins; 8(1), 20-8 (2003).

Honigmann, Chelsea
Conceptual Design for the Sunniberg Bridge. —Chelsea Honigmann and David P. Billington; 8(3), 122-30 (2003).

Issa, Camille
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).

Jajich, D.
Measurement and Analysis of Distortion-Induced Fatigue in Multigirder Steel Bridges. —D. Jajich and A. E. Schultz; 8(2), 84-91 (2003).

Janjic, D.
Optimization of Cable Tensioning in Cable-Stayed Bridges. — D. Janjic, M. Pircher, and H. Pircher; 8(3), 131-7 (2003).

Jáuregui, David V.
Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. — David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Kaw, Autar K.
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. — Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).

Kennedy, John B.
Design for Shear in Curved Composite Multiple Steel Box Girder Bridges. — Khaled Sennah, John B. Kennedy, and Said Nour; 8(3), 144-52 (2003).

Kerr, Richard
Florida DOT Project-Level Bridge Management Models. — Paul D. Thompson, John O. Sobanjo, and Richard Kerr; 8(6), 345-52 (2003).

Khaloo, Ali R.
Load Distribution Factors in Simply Supported Skew Bridges. —Ali R. Khaloo and H. Mirzabozorg; 8(4), 241-4 (2003).

King, W. S.
Experimental Investigations of Bailey Bridges. —W. S. King and L. Duan; 8(5), 334-9 (2003).

Kwan, Wing-Pin
Unbonded Posttensioned Concrete Bridge Piers. I: Monotonic and Cyclic Analyses. —Wing-Pin Kwan and Sarah L. Billington; 8(2), 92-101 (2003).
Unbonded Posttensioned Concrete Bridge Piers. II: Seismic Analyses. —Wing-Pin Kwan and Sarah L. Billington; 8(2), 102-11 (2003).

Lam, Tam
Full-Scale Tests of Seismic Cable Restrainer Retrofits for Simply Supported Bridges. —Reginald DesRoches, Thomas Pfeifer , Roberto T. Leon, and Tam Lam; 8(4), 191-8 (2003).

Leitch, Kenneth R.
Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. —David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Leon, Roberto T.
Full-Scale Tests of Seismic Cable Restrainer Retrofits for Simply Supported Bridges. —Reginald DesRoches, Thomas Pfeifer , Roberto T. Leon, and Tam Lam; 8(4), 191-8 (2003).

Leoni, Graziano
Local Effects Induced by Longitudinal Forces in Composite Girders. —Luigino Dezi and Graziano Leoni; 8(4), 245-8 (2003).

Li, Jianzhong
Natural Frequency of Railway Girder Bridges under Vehicle Loads. —Jianzhong Li, Mubiao Su, and Lichu Fan; 8(4), 199-203 (2003).

Limongelli, M. P.
Assessment of Shear Forces on Bridge Abutments: Simplified Method. —G. Benzoni, M. P. Limongelli, and M. J. N. Priestley; 8(1), 29-38 (2003).

Liu, G. D.
Construction Control of Reinforced Concrete Arch Bridges. — F. T. K. Au, J. J. Wang, and G. D. Liu; 8(1), 39-45 (2003).

Liu, Ming
Model Validation for Bridge-Road-Vehicle Dynamic Interaction System. — Hani H. Nassif, Ming Liu, and Oguz Ertekin; 8(2), 112-20 (2003).

Lounis, Z.
Identification of Environmental Categories for Markovian Deterioration Models of Bridge Decks. — G. Morcous, Z. Lounis, and M. S. Mirza; 8(6), 353-61 (2003).

Lovejoy, Steven C.
Determining Appropriate Fatigue Inspection Intervals for Steel Bridge Members. — Steven C. Lovejoy; 8(2), 66-72 (2003).

Lu, Feng
Nonlinear Finite-Element Analysis for Highway Bridge Superstructures. — Kuan-Chen Fu and Feng Lu; 8(3), 173-9 (2003).

Lu, Yong
Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).

Meda, A.
Design and Construction of a Bridge in Very High Performance Fiber-Reinforced Concrete. —A. Meda and G. Rosati; 8(5), 281-7 (2003).

Mertz, D. R.
Deflection Requirements for Bridges Constructed with Advanced Composite Materials. —J. R. Demitz, D. R. Mertz, and J. W. Gillespie; 8(2), 73-83 (2003).

Mertz, Dennis R.
Editor's Note. —Dennis R. Mertz; 8(1), 1 (2003).
Editor's Note. —Dennis R. Mertz; 8(3), 121 (2003).
Editor's Note. —Dennis R. Mertz; 8(4), 181 (2003).

Miller, Richard
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).

Mirmiran, Amir
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).

Mirza, M. S.
Identification of Environmental Categories for Markovian Deterioration Models of Bridge Decks. — G. Morcous, Z. Lounis, and M. S. Mirza; 8(6), 353-61 (2003).

Mirzabozorg, H.
Load Distribution Factors in Simply Supported Skew Bridges. —Ali R. Khaloo and H. Mirzabozorg; 8(4), 241-4 (2003).

Morcous, G.
Identification of Environmental Categories for Markovian Deterioration Models of Bridge Decks. — G. Morcous, Z. Lounis, and M. S. Mirza; 8(6), 353-61 (2003).

Moses, Fred
Predicting Truck Load Spectra under Weight Limit Changes and Its Application to Steel Bridge Fatigue Assessment. — Harry Cohen, Gongkang Fu, Wassem Dekelbab, and Fred Moses; 8(5), 312-22 (2003).

Moyo, Pilate
Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).

Nassif, Hani H.
Model Validation for Bridge-Road-Vehicle Dynamic Interaction System. — Hani H. Nassif, Ming Liu, and Oguz Ertekin; 8(2), 112-20 (2003).

Navarro-Cerpa, Alfredo
Inspection and Process of Tension of Cables of General Rafael Urdaneta Bridge. — Antonio Sarcos-Portillo, Alfredo Navarro-Cerpa, and Hildrun García-Legl; 8(4), 223-8 (2003).

Nichani, Sanjeev
Full-Scale Testing of Procedures for Assembling Trunnion-Hub-Girder in Bascule Bridges. —Glen Besterfield, Sanjeev Nichani, Autar K. Kaw, and Thomas Eason; 8(4), 204-11 (2003).

Nour, Said
Design for Shear in Curved Composite Multiple Steel Box Girder Bridges. —Khaled Sennah, John B. Kennedy, and Said Nour; 8(3), 144-52 (2003).

Omenzetter, Piotr
Assessment of Highway Bridge Upgrading by Dynamic Testing and Finite-Element Model Updating. — James Mark William Brownjohn, Pilate Moyo, Piotr Omenzetter, and Yong Lu; 8(3), 162-72 (2003).

Peterson, Bruce E.
Changes. —Bruce E. Peterson; 8(5), 252-5 (2003).
Editor's Note. —Bruce E. Peterson; 8(5), 256-8 (2003).

Pfeifer , Thomas
Full-Scale Tests of Seismic Cable Restrainer Retrofits for Simply Supported Bridges. —Reginald DesRoches, Thomas Pfeifer , Roberto T. Leon, and Tam Lam; 8(4), 191-8 (2003).

Pircher, H.
Optimization of Cable Tensioning in Cable-Stayed Bridges. —D. Janjic, M. Pircher, and H. Pircher; 8(3), 131-7 (2003).

Pircher, M.
Optimization of Cable Tensioning in Cable-Stayed Bridges. —D. Janjic, M. Pircher, and H. Pircher; 8(3), 131-7 (2003).

Popescu, Clara
Risk-Based Expenditure Allocation for Infrastructure Improvement. —Bilal M. Ayyub and Clara Popescu; 8(6), 394-404 (2003).

Priestley, M. J. N.
Assessment of Shear Forces on Bridge Abutments: Simplified Method. —G. Benzoni, M. P. Limongelli, and M. J. N. Priestley; 8(1), 29-38 (2003).

Roberts-Wollman, Carin L.
Closure to "Measurements of Thermal Gradients and their Effects on Segmental Concrete Bridge" by Carin L. Roberts- Wollman, John E. Breen, and Jason Cawrse. — Carin L. Roberts-Wollman, John E. Breen, and Jason Cawrse; 8(5), 341-2 (2003).

Roddis, W. M. Kim
Finite-Element Analysis of Steel Bridge Distortion-Induced Fatigue. — W. M. Kim Roddis and Yuan Zhao; 8(5), 259-66 (2003).

Roeder, Charles W.
Proposed Design Method for Thermal Bridge Movements. — Charles W. Roeder; 8(1), 12-9 (2003).

Rosati, G.
Design and Construction of a Bridge in Very High Performance Fiber-Reinforced Concrete. — A. Meda and G. Rosati; 8(5), 281-7 (2003).

Roussis, Panayiotis C.
Assessment of Performance of Seismic Isolation System of Bolu Viaduct. —Panayiotis C. Roussis, Michael C. Constantinou, Mustafa Erdik, Eser Durukal, and Murat Dicleli; 8(4), 182-90 (2003).

Sarcos-Portillo, Antonio
Inspection and Process of Tension of Cables of General Rafael Urdaneta Bridge. —Antonio Sarcos-Portillo, Alfredo Navarro-Cerpa, and Hildrun García-Legl; 8(4), 223-8 (2003).

Schultz, A. E.
Measurement and Analysis of Distortion-Induced Fatigue in Multigirder Steel Bridges. —D. Jajich and A. E. Schultz; 8(2), 84-91 (2003).

Sen, Rajan
Finite-Element Modeling of Heat-Curved I-Girders. — Rajan Sen, Antoine N. Gergess, and Camille Issa; 8(3), 153-61 (2003).

Sennah, Khaled
Design for Shear in Curved Composite Multiple Steel Box Girder Bridges. —Khaled Sennah, John B. Kennedy, and Said Nour; 8(3), 144-52 (2003).

Shah, Ronak
State of Practice for Positive Moment Connections in Prestressed Concrete Girders Made Continuous. — Makarand Hastak, Amir Mirmiran, Richard Miller, Ronak Shah, and Reid Castrodale; 8(5), 267-72 (2003).

Sherif, Alaa
Stability of Slender Webs of Prestressed Concrete Box-Girder Bridges. —Walter Dilger and Alaa Sherif; 8(3), 138-43 (2003).

Smith, Brian W.
Discussion of "Measurements of Thermal Gradients and their Effects on Segmental Concrete Bridge" by Carin L. Roberts-Wollman, John E. Breen, and Jason Cawrse. —Brian W. Smith and Mary Emerson; 8(5), 340-1 (2003).

Sobanjo, John O.
Florida DOT Project-Level Bridge Management Models. — Paul D. Thompson, John O. Sobanjo, and Richard Kerr; 8(6), 345-52 (2003).

Song, Shin-Tai
Live-Load Distribution Factors for Concrete Box-Girder Bridges. —Shin-Tai Song, Y. H. Chai, and Susan E. Hida; 8(5), 273-80 (2003).

Stewart, Mark G.
Multiple Limit States and Expected Failure Costs for Deteriorating Reinforced Concrete Bridges. — Mark G. Stewart and Dimitri V. Val; 8(6), 405-15 (2003).

Su, Mubiao
Natural Frequency of Railway Girder Bridges under Vehicle Loads. — Jianzhong Li, Mubiao Su, and Lichu Fan; 8(4), 199-203 (2003).

Tang, K. H.
Tuned Mass Dampers for Dual-Mode Buffeting Control of Bridges. — C. C. Chang, M. Gu, and K. H. Tang; 8(4), 237-40 (2003).

Thompson, Paul D.
Florida DOT Project-Level Bridge Management Models. — Paul D. Thompson, John O. Sobanjo, and Richard Kerr; 8(6), 345-52 (2003).

Tindal, Troy T.
Thermal Effects on Skewed Steel Highway Bridges and Bearing Orientation. — Troy T. Tindal and Chai H. Yoo; 8(2), 57-65 (2003).

Tsakopoulos, Paul A.
Full-Scale Fatigue Tests of Steel Orthotropic Decks for the Williamsburg Bridge. —Paul A. Tsakopoulos and John W. Fisher; 8(5), 323-33 (2003).

Val, Dimitri V.
Multiple Limit States and Expected Failure Costs for Deteriorating Reinforced Concrete Bridges. —Mark G. Stewart and Dimitri V. Val; 8(6), 405-15 (2003).

Wang, J. J.
Construction Control of Reinforced Concrete Arch Bridges. —F. T. K. Au, J. J. Wang, and G. D. Liu; 8(1), 39-45 (2003).

White, Kenneth R.
Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. —David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Woodward, Clinton B.
Noncontact Photogrammetric Measurement of Vertical Bridge Deflection. —David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch; 8(4), 212-22 (2003).

Wu, Z. S.
Neural Networks for Decentralized Control of Cable-Stayed Bridge. —B. Xu, Z. S. Wu, and K. Yokoyama; 8(4), 229-36 (2003).

Xia, H.
Dynamic Response of Suspension Bridge to High Wind and Running Train. —Y. L. Xu, H. Xia, and Q. S. Yan; 8(1), 46-55 (2003).

Xu, B.
Neural Networks for Decentralized Control of Cable-Stayed Bridge. —B. Xu, Z. S. Wu, and K. Yokoyama; 8(4), 229-36 (2003).

Xu, Y. L.
Dynamic Response of Suspension Bridge to High Wind and Running Train. —Y. L. Xu, H. Xia, and Q. S. Yan; 8(1), 46-55 (2003).

Yan, Q. S.
Dynamic Response of Suspension Bridge to High Wind and Running Train. —Y. L. Xu, H. Xia, and Q. S. Yan; 8(1), 46-55 (2003).

Yokoyama, K.
Neural Networks for Decentralized Control of Cable-Stayed Bridge. — B. Xu, Z. S. Wu, and K. Yokoyama; 8(4), 229-36 (2003).

Yoo, Chai H.
Thermal Effects on Skewed Steel Highway Bridges and Bearing Orientation. — Troy T. Tindal and Chai H. Yoo; 8(2), 57-65 (2003).

Zhao, Yuan
Finite-Element Analysis of Steel Bridge Distortion-Induced Fatigue. — W. M. Kim Roddis and Yuan Zhao; 8(5), 259-66 (2003).
